

# Lucas Gabriel de Oliveira Silva

Operations & Finance Analyst | Data & Excel | Economic & Crypto Research | Administrative Operations

Portimão, Portugal | +351 961372146 | gajel2858@gmail.com

## PROFESSIONAL SUMMARY

27-year-old operations and administrative professional based in Portugal, with hands-on experience in financial and administrative processes, document validation, reporting, data organization, Excel-based controls, and operational planning within the Brazilian Federal Public Administration. Experienced in working with integrated accounting and financial administration systems, including SIAFI, as well as preparing and reviewing contracts, management reports, schedules, and operational records. Strong analytical mindset with advanced computer skills and a particular interest in financial markets, Austrian Economics, monetary theory, digital assets, blockchain, DeFi and crypto-market research. Seeking a remote position where operational discipline, financial process knowledge, data analysis and independent research can be applied in an international environment.

## CORE COMPETENCIES

- Financial operations and administrative controls
- Accounts payable process support and payment documentation
- Financial document review and validation
- Data reconciliation, organization and quality control
- Excel spreadsheets, reporting and operational dashboards
- Administrative and financial systems — SIAFI
- Contract and management-report preparation and review
- Process monitoring, scheduling and deadline control
- Operational planning and multi-location coordination
- Economic and financial research
- Austrian Economics and monetary theory
- Cryptocurrency and digital-asset market research
- Blockchain, DeFi, tokenomics and Web3
- Market narratives, on-chain concepts and crypto ecosystem analysis
- Content research, newsletters and social media
- Advanced computer skills and remote-work readiness

## PROFESSIONAL EXPERIENCE

**Professional Soldier** | Brazilian Army — 7th Engineering and Combat Battalion

- Supported the preparation, organization and processing of administrative cases related to payments within the Federal Public Administration.
- Reviewed financial and administrative documentation to verify completeness, consistency and compliance with established procedures before payment processing.
- Operated integrated accounting and financial administration systems used by the Federal Public Administration, including SIAFI.
- Supported financial and administrative workflows involving documentation, controls, records and payment-related processes.
- Prepared and reviewed contracts and management reports, ensuring information was organized and suitable for administrative decision-making.

- Built and maintained Excel spreadsheets used for operational and administrative control, tracking and reporting.
- Prepared operational schedules and monitored deadlines, deliveries and execution against planned activities.
- Analyzed and monitored water-delivery operations through GPIPA and related control tools.
- Supported the planning and monitoring of water distribution covering more than 26 municipalities in Rio Grande do Norte affected by drought.
- Consolidated operational information and monitored multiple workstreams simultaneously, requiring accuracy, accountability and strict adherence to procedures.
- Worked in a high-responsibility environment where data accuracy, documentation quality, process discipline and timely execution were essential.

## **FINANCIAL & ECONOMIC KNOWLEDGE**

Financial Operations — Practical experience supporting public-sector financial administration, including payment-related administrative processes, documentary verification, financial records, internal controls and the use of integrated accounting/financial systems. Experienced in organizing information required for financial processing, reviewing supporting documentation and producing management-oriented reports. Strong Excel skills for data organization, tracking, reconciliation-style controls and operational reporting.

Economic Research — Strong self-directed interest in Austrian Economics, monetary economics and the relationship between money, credit, inflation, interest rates, central-bank policy, economic incentives and financial markets. Comfortable conducting independent research, comparing sources, structuring information and developing written analytical summaries.

## **CRYPTOCURRENCY, BLOCKCHAIN & DIGITAL ASSETS**

Digital Asset Research — Advanced personal interest and extensive self-directed study of cryptocurrencies and the digital-asset ecosystem. Regularly follows market structure, Bitcoin, major crypto assets, blockchain developments, DeFi, tokenomics, Web3 projects and market narratives.

- Bitcoin and monetary properties: scarcity, issuance, decentralization, self-custody and the relationship between Bitcoin and monetary theory.
- Crypto market structure: market cycles, liquidity, volatility, narratives, market sentiment and the interaction between macroeconomic conditions and digital assets.
- Blockchain fundamentals: decentralized networks, consensus concepts, wallets, transactions, smart contracts and the economic incentives supporting blockchain ecosystems.
- DeFi: decentralized exchanges, lending/borrowing protocols, liquidity provision, stablecoins and the economic mechanisms behind decentralized financial applications.
- Tokenomics: supply schedules, token issuance, distribution, incentives, utility, governance and factors that can influence the economic sustainability of crypto projects.
- Research and due diligence: collecting information from multiple sources, comparing project fundamentals, identifying relevant risks and separating market narratives from underlying data.
- Macro/crypto intersection: interest in how inflation, liquidity, monetary policy, interest rates and broader financial conditions affect digital-asset markets.
- Crypto content and information monitoring: following market news, research, social-media narratives and ecosystem developments and organizing them into structured information.

Important: The cryptocurrency knowledge described above is primarily self-directed research and personal study, rather than formal employment as a professional crypto analyst. This distinction can be clarified during interviews.

## CONTENT & RESEARCH

- Research, selection and organization of information for newsletter-oriented content.
- Experience and interest in Catholic newsletter content and digital communication.
- Interest in social media research, content development and information curation.
- Ability to turn complex economic, financial or technical information into structured and understandable material.

## TECHNICAL SKILLS

Excel: Advanced | Microsoft Office: Advanced | Data Organization & Analysis: Advanced | General IT: Advanced | Financial/Administrative Systems: Professional Experience | Online Research: Advanced

## LANGUAGES

Portuguese: Native | Spanish: [LEVEL TO CONFIRM] | English: Intermediate

## REMOTE WORK & AVAILABILITY

- Based in Portimão, Portugal.
- Available for remote work with Portuguese and international companies.
- Available for up to 12 hours per day.
- Open to international and multicultural work environments.
